CULTIVATED AND FOR SALE BY

J. A. CALDWELL,

LAFAYETTE NURSERY

LAFAYETTE, GA.

In presenting this little leaflet it is our aim to bring to your notice an extensive stock of trees, plants etc., that have been grown under a thorough state of cultivation especially adapted to the middle and southern states, and since so much depends on the nurseryman for the production of the best varieties and true to name he must by labor and experience be prepared to furnish that which will give satisfaction to the purchaser. It is therefore our aim to give the description and time of ripening as accurately as possible and in so doing to assist the purchasers in making their selections. We strive for superiority of quality and genuineness of variety in all our productions knowing that with the majority of tree planters, life is too short to be wasted and deceived with worthless sickly varieties when healthy and reliable ones may be obtained. Life is too short and too serious and I have neither the time nor inclination to cultivate my imagination in an effort to invent some plausible argument to induce home builders to pay high prices for the hot air in some frost proof, exclusive right trade mark or other blue sky scheme. There is no monopoly, either on varieties or on method of growing trees when a customer buys one of these wonderful productions, ninety-nine times out of a hundred he pays twenty-five cents for a poor variety and one dollar for hot air and persuasive eloquence.

For the last twenty years I have made my living chiefly by growing and selling nursery stock. I expect to continue in the business and hope to make more money in the future than in the past, at the same time I wish to conduct my business in such a way that I may carry in my own mind the consciousness that my work is helpful to the world and that I am adding my share of labor to the sum total of human effort, which is constantly making of this world a better place for all of us to live in.

Our aim is to excel in quality and in every case give an equal value for your money and by adhering strictly to this method we hope to be favored with your patronage.

Yours for more and better fruit.

J. A. CALDWELL.

Varieties of Peaches

Henderson's Extra Early—Faster than Mayflower, not quite so highly colored but better in quality. The only extra early freestone peach yet introduced, being a perfect freestone when thoroughly ripe. Fruit medium size cream colored, being almost over splashed with red. Gives promise of becoming a valuable market peach. Stock is limited. The Price, 75c each.

Mayflower—One among the best early peaches, ripens one week before the Sned, blooms late not so apt to be killed by late spring frost. Color, red all over, a prolific bearer.

Greensboro—Good early clingstone peach for home use.

Arps Beauty—Earliest freestone yellow peach. Tree a strong grower Elberta type and the first of all early peaches that has quality. A good shipper.

Carman—Fruit large freestone when good ripe, flesh white, good quality.

Hiley (Early Belle)—Medium to large, skin white with red cheekles white, firm, of excellent flavor. Tree a rapid grower and very prolific. Ripens two weeks before Belle of Ga.

Champion—One of the best white fleshed peaches, a perfect freestone and larger than Carman which it resembles in color.

Belle of Ga.—A favorite market peach that has stood the test.

Ea. Wheeler (Red Bird)—A recently introduced Texas variety. One of the largest and best colored early peach, clingstone, very firm. Market. Ripens 1st June.

Elberta—Large yellow freestone. May justly be called the universal peach. There is no home or commercial orchard complete without it.

Heath Cling—Fruit very large quality good, one of the best clingstone peaches, ripens two weeks after Elberta.

Hale—A fine shower peach of Elberta type. Ripens a few days earlier than Elberta.

West—A fine late variety. Ripens 20 days after Elberta.

Mammoth Cling—Very late, showy peach of fine quality.

Stinson Oct.—Clingstone, white flesh. Ripens in September here.

Prices Pear Trees

Each

1 year.....1 to 5 feet.....	60c
1 year.....3 to 4 feet.....	50c
1 year.....2 to 3 feet.....	40c
1 year.....1 to 2 feet.....	30c

Kiffer—One of the best late varieties. Tree hardy, fruit large, bears young.

Garber—Hardy and bears young. Large, slight red blush, one of the best.

Koonee—One of the earliest, ripens in June. A good bearer and fine quality.

Apples for Summer

Yellow Transparent — Upright grower, bears young and fruit ripens early. Best early apple. June 1st to 20th.

Early Harvest—Oldest and best known Juile apple. Succeeds everywhere. June 10th to July.

Red June—Deep red, tender and juicy. Tree rather weak grower. June 10th to middle July.

Horse—Large roundish, skin yellow, slightly tinged with red in the sun, acid and tender. July and August.

Maiden Bush—Clear skin with delicate red blush. Best all purpose summer apple. Long season of ripening, makes it especially good where there is only room for a few trees. July 15 to September.

Rainbo—Hardy grower, heavy bearer after trees are six or eight years old. Yellowish striped, with dull red. Tender and good. September.

Wealthy—An apple of fine appearance and quality large and fine flavored. Tree bears young.

Apples for Winter

Arkansas Black—Tree a beautiful upright but rather weak, fruit large, fine flavor, beautiful dark color, a long bearer.

Ben Davis—One of the best known standard sorts.

Grimes Golden—Best eating apple grown. Good market and keeps well in storage.

Jonathan—One of the best, not only on account of its fine flavor, but equally on account of hardiness of the trees. Highly colored. Brings top prices.

Mammoth Black Twig—Very large, flat, dark red. Good quality and valuable for market.

Black Ben Davis—Of the Ben Davis type, a large red apple hardy and fine for market.

Wine Sap—Medium dark red, good grower and bearer, a favorite market variety, good keeper.

Yates—Rather small, red with many little white dots, flesh white, tender and juicy partaking the flavor of the pear, very long keeper.

Shockley and old Standard variety, keeps well and tree very hardy. Fruit noted for its fine preserving qualities.

York Imperial — Large greenish yellow, nearly covered with bright red, flesh fine, crisp, juicy and sub-acid, an enormous bearer and good keeper, hangs well on the tree, one of the best winter apples.

Bonana — Fancy market variety large size, fruit a pale yellow with a little tinge of red in some.

Delicious—One of the finest apples grown, large red oblong in shape, superior in quality. There is no apple that brings a better price than it and Bonana. You can't go a miss on them.

Stayman Winesap—Fruit is larger and tree harder than Winesap. fruit not quite so well colored, profitable market variety.
